IFM Network Performance Metrics
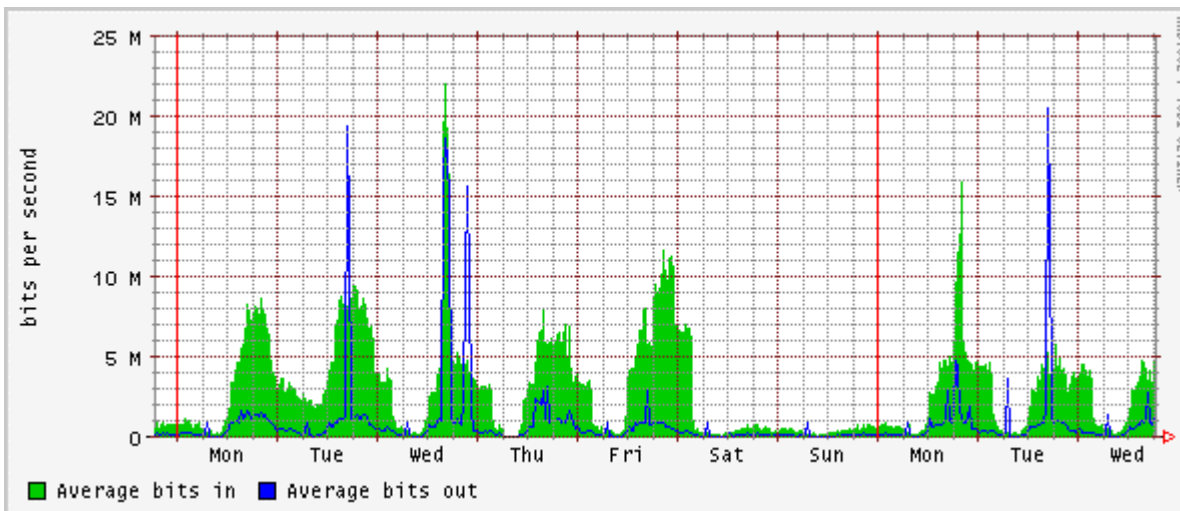

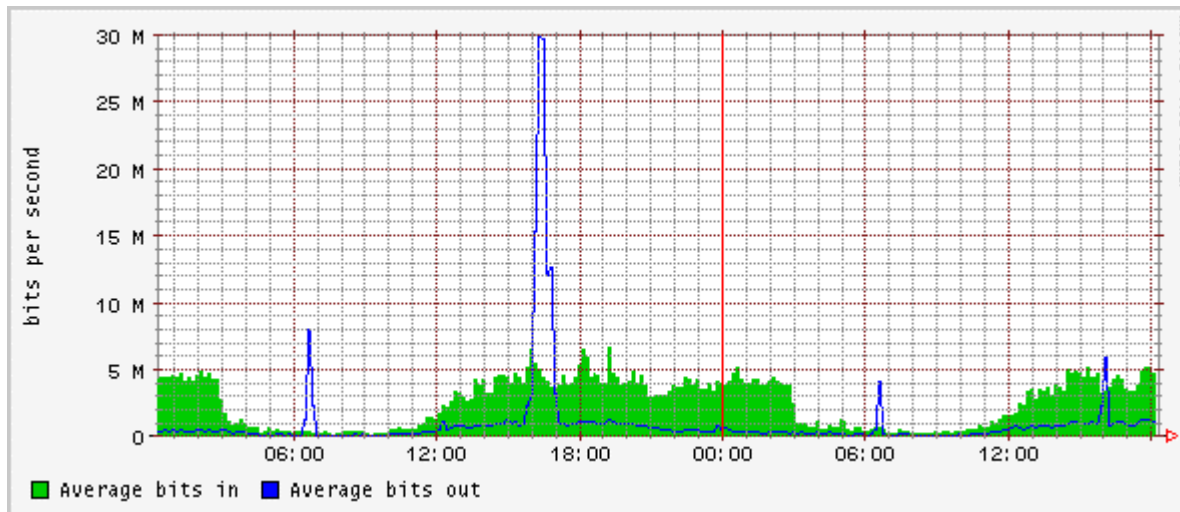

June 25th, 2003

IFM Network Performance

Significant events

- Note that there was a slight increase in traffic entering the data Center on Tuesday afternoon. We are still investigating this event.
- No other significant events have occurred.

Notes: Average bits in (Green) refers to bits out of IFM Network.
Average bits out (blue) refers to traffic coming into the IFM network.
(Stats are taken from WAN Router)

IFM Network Stats
(Weekly and Monthly)

Notes: Average bits in (Green) refers to bits out of IFM Network.
Average bits out (blue) refers to traffic coming into the IFM network.
